

# Prime Panels setup: Survey Gizmo

**Step 1:** Add a new action at the beginning of your survey. By 'Hidden Value', click 'Add'.

**Step 2:** Under the field 'Populate with the following,' you should see 'Select a Merge Code' written in blue.

Click on 'Select a Merge Code' to display a dropdown box. In the dropdown box select "About the Respondent."

The screenshot shows the 'Edit Action' interface. On the left, there is a preview of a survey form with sections for 'Can I stop being in the study and what are my rights?' and 'Who do I contact if I have questions?'. Below the preview are two radio buttons: 'Continue' and 'Cancel participation'. The main area is titled 'Edit Action' and has tabs for 'PRIMARY SETUP' and 'LOGIC'. A 'Name' field contains 'New Hidden Value'. Below it is a 'Populate with the following' section with a search bar and a 'Close' button. A dropdown menu is open, showing options: 'Email Invite Fields', 'About the Respondent' (circled in orange), 'About the Survey', and 'About Your Account'. A blue notification box states: 'Notice: Because this is the first page, there are no previous pages from which to get merge codes.'

After clicking About the Respondent, you will see 'URL Variable' to the right. Click 'Insert' next to URL Variable.

The screenshot shows the 'Edit Action' interface with the 'About The Respondent' dropdown menu open. The menu lists several options: 'Edit Link', 'Session ID', 'URL Variable', and 'SSO Variable'. Each option has an 'Insert' button to its right. A blue arrow points to the 'Insert' button next to 'URL Variable'. The 'URL Variable' option is highlighted in grey. The 'Name' field above still contains 'New Hidden Value'. The 'Populate with the following' section has a search bar and a 'Close' button.

**Step 3:** In the ‘Populate with the following’ field, replace the xxx with aid. Select “Save Action”.

The screenshot shows the survey builder interface. On the left, a preview of 'Page 1: (untitled) ID: 1' is visible, containing a 'Hidden Value Action' block with the name 'aid' and the value '[url("aid")]'. Below this, a 'Thank You Page: Thank You! ID: 2' is partially visible. On the right, the 'PRIMARY SETUP' panel is open, showing the configuration for the 'aid' action. The 'Name' field contains 'aid'. The 'Populate with the following:' field contains '[url("aid")]'. The 'Populate with a calculated value:' dropdown is set to '[none]'. The interface includes a top navigation bar with 'BUILD', 'STYLE', 'TEST', 'SHARE', 'RESULTS', and 'TOOLS' tabs, and a 'NEED HELP?' link.

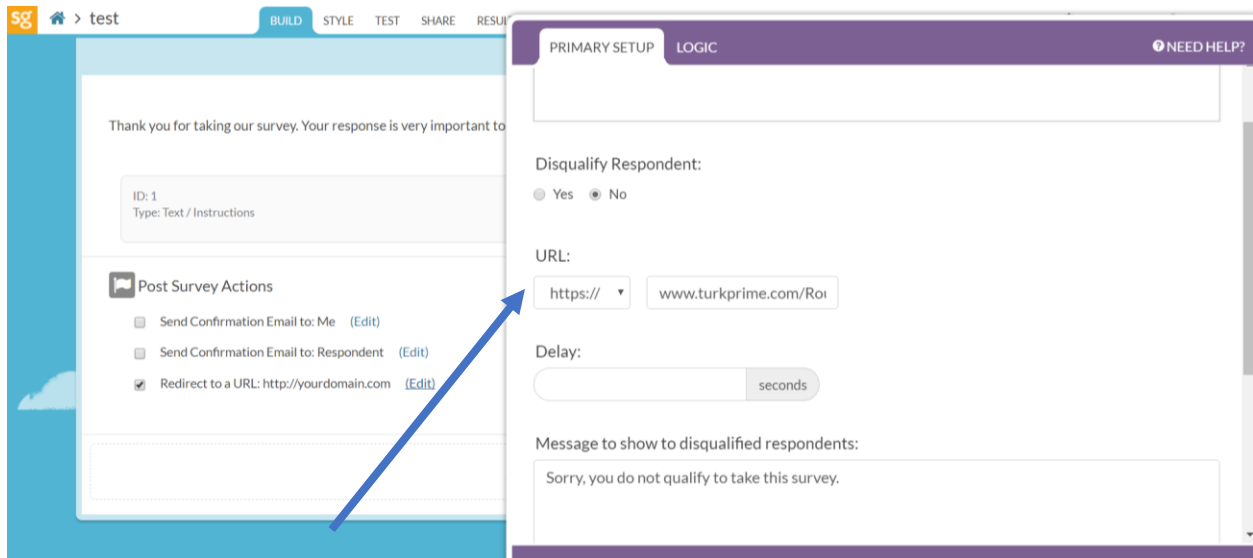

**Please Note:** The hidden action value that this process sets up must appear at the beginning of your survey. Participants will not see this block since it is hidden. The survey will still start with the first block after the hidden action.

**Step 4:** Scroll down to your Thank You page (end of survey). Add a new action by clicking ‘Actions’ and then look for ‘Redirect to a URL’. Next to ‘Redirect to a URL’ click the green ‘Add’ button.

The screenshot shows the 'Actions' menu in the survey builder. At the top, there is a purple header with the word 'Actions' and an 'ADD ACTION' button. Below the header, there is a section titled 'What are actions?' with a brief description: 'Actions let you enhance the functionality of your survey, making it work exactly how you need it to. Actions can get data in and out of other products, change how a survey operates, and even run custom scripts.' Below this, there is a section titled 'Survey Actions' which lists several actions with their descriptions and a green '+ Add' button next to each:

Action Name	Description	Add Button
Result Chart	Show your respondents how other people answered your survey in a pie or bar chart	+ Add
Quiz Score	Calculate a pass/fail or tallied score based upon respondents' answers	+ Add
URL Redirect	Send respondents to an external website, can be used upon completion, or in combination with disqualification	+ Add
Send Email	Allows you to send an email at the completion of your survey to respondents, colleagues, yourself or anyone else you see fit to notify!	+ Add
Review	Allow your respondents to review their responses and give them a chance to change their mind before submitting the survey	+ Add
Section Navigator	Allow respondents to jump through sections in the survey using page groups and ask other people to fill out sections for them (optionally)	+ Add

**Step 5:** Change from http to https under the URL dropdown list. Put the corresponding link in as [www.turkprime.com/Router/End](https://www.turkprime.com/Router/End)

**Step 6:** Scroll down on the same page to the 'Fields to pass' section. Select "aid" from the dropdown list. Then select 'add field'.
